Renewable Generation Resource Guidelines

- Manageable quantity
- Maintain regulation capability
- Geographic diversity
- Economic/retail electric rate impact
- Public sentiment considerations
- Partial hedge against energy price increases
- Maintain transmission deliverability
- Find balance between renewable generation capacity goals and energy costs
- Gain operating experience and performance data

Renewable Generation Recent Purchase Decision Making Process

- Indications of favorable market conditions
- Production tax credit timing
- Generation resource mix concerns
- Southwest Power Pool
 - Ability to regulate (balance load to generation)
 - Timing of Integrated Marketplace
 - Impact on project capacity rating
- Structured Request-for-Proposals process
- Economic and technical analysis

Renewable Generation Southwest Power Pool Integrated Marketplace

- Consolidated balancing area functionality
- Nodal price evaluation
- Transmission service
- Base plan funding
